ENERGY

ABOUT US

Supreme Energy is a company incorporated in Nigeria under the Allied Matters and Companies Decree of 1990. Supreme Energy provides Specialist Engineering Design, Fabrication Services, Marine Logistics Services, Oil & Gas Procurement Services, Project Management Services, and Construction Engineering Mechanical and Piping Support to EPC companies and operators throughout Nigeria and West Africa on construction and maintenance of brown field campaigns—backed by several years of international experience.

MISSION STATEMENT

Our mission is to excel in our field of business. This we hope to realize through:

- Consistent delivery of high quality products that is fit for the purpose, using cutting edge technology without compromising completion target and standards.
- Provision of premium customer service and products with a total commitment to our employees, customers, community and environment.
- Commitment to employee development through quality and regular training.
- Demonstration of teamwork spirit with emphasis on honesty and integrity.
- Detailed analysis of project requirement by utilizing trained and experience personnel with strong emphasis on teamwork.

CORE VALUES

Our core values include people, professionalism, quality, timeliness, efficiency, safety, service, partnership and **mutual benefit** (we believe that mutual benefit is a sine qua non in every lasting relationship, whether business or personal). The endpoint of these values is clientele satisfaction.

PROJECT MANAGEMENT

Precise execution of projects and programs is imperative to cost containment, sustainability, growth, and profitability. Supreme Energy's project management professionals are the perfect fit to help guide, lead, and support your mission-critical program and project initiatives. Our trusted professionals help you maintain focus on critical project activities to attain desired business results. What we provide is project management culture engineering.

At Supreme Energy, we are committed to delivering the best value for your project. Our integrated approach to project planning ensures that the Scope, Strategic Direction, Risks, Resource Requirements, Constraints, and Assumptions are addressed early during the project conceptualization and planning stage. This provides the framework for a proactive response to restore objectives when deviations occur during the monitoring and controlling processes.

Our Services Include:

- a. Managing Projects and Programs: Helping clients effectively manage projects of all sizes. This can be done through our full-time on-site program and project managers.
- b. Project Support: Supreme Energy has a specialized pool of expert Project Controllers, Planners, and Schedulers who have experience in Project Audits, Risk Assessments, Post-Project Reviews, Project Management Mentoring, Project Rescue Services, and Project Control (planning, scheduling, and reporting).
- c. Project Management Office (PMO) Deployment: Effective and consistent project management practices are a key factor in the success of projects—and therefore the success of the organization. Establishing a Project Management Office (PMO) enables you to implement PM best practices and achieve consistency in the use of those practices across all projects.

QA & QC

Our key objective at Supreme Energy is to provide high-quality midpoint services. We maintain an in-house quality control department headed by a qualified engineer to ensure that all materials, services, and work are in accordance with the provisions of industrial standards, client requirements, and our challengingly high internal standards.

SAFETY

Supreme Energy is committed to conducting all operations in the safest, healthiest, and most environmentally responsible manner. No phase of its operation or administration is or shall be considered more important than accident prevention or the protection of the environment. The goal of Supreme Energy is to eliminate personal injury, property damage, and the needless suffering and waste that follow. The management of Supreme Energy has dedicated itself to providing leadership and support in order to develop and maintain Health, Safety, and Environment programs. Supreme Energy will incorporate strict policies and encourage full compliance with all applicable laws and regulations. It will also strive to minimize hazardous wastes efficiently and handle such wastes in an environmentally sound manner. Supreme Energy will train its employees in good safety practices and periodically update them on new procedures, as well as promote its HSE commitment to employees and the general public.

In accordance with all local, state, and federal laws, Supreme Energy will provide all authorities with an Emergency Preparedness guide to use should a disastrous event occur at any of its facilities.

The Supreme Energy management and workforce will comply with all applicable HS&E laws and requirements and adhere to all industry standards. A program has been implemented to ensure the security, protection, and health of Supreme Energy personnel and property by the prevention and control of physical violence, misconduct, theft, sabotage, and alcohol and drug abuse.

Supreme Energy promotes a healthy and safe lifestyle to all employees away from work as well as on the job. Supreme Energy expects all employees to cooperate with this vital program because its success depends on everyone.

ORGANIZATIONAL STRUCTURE

In our pursuit of excellence in engineering practice, we deploy a team of experienced, dedicated, and well-motivated professional engineers and project administrators.

The business interest areas of the company are known as divisions. These divisions are: Oil and Gas Servicing, Environmental Services, Civil & Structural Engineering, Procurement, and Project Management. The functions of the organization are divided into Operations and Administration. A competent Manager coordinates each division. The Divisional Manager reports to the Director (Operations). The commercial functions of the organization are coordinated by the Admin/Commercial Officer in each division. These officers have dual reporting responsibilities to both the Divisional Managers and the General Manager.

Supreme Energy has evolved this organizational structure to effectively handle complex and medium-sized projects while maintaining the flexibility necessary to deliver efficiently on smaller jobs and meet specific client requirements.
